

ShotTag™

Tags for Fabricators and Metal Painting/Bead Blasting Contractors

	ShotTag™
<i>Industry</i>	Metals fabrication
<i>Typical Customer</i>	Fabricators; Bead blasting contractors
<i>Purpose</i>	Tracking in-process assemblies and lots through chemical cleaning, shot blasting, and painting
<i>Resistance</i>	
<i>Heat</i>	1000°F (538°C) after removal of protective laminate
<i>Chemical</i>	180°F (82°C) in 20% H ₂ SO ₄ for 2 hours; or 100°F (38°C) in 24% HCL for 2 hours. Similar for ZnCl and NH ₄ Cl.
<i>Abrasion</i>	Moderate
<i>Ultraviolet</i>	Highly resistant to sunlight and fading
<i>Sizes</i>	<i>Width:</i> 3.0 in (75 mm) <i>Lengths:</i> to customer specification, not less than 1.0 in (25mm) <i>Typical length:</i> 4.0 in (102 mm)
<i>Composition</i>	Metal with high contrast laser-markable coatings and specialty laminate
<i>Available for PrePrint</i>	Yes
<i>Available Colors</i>	White, colors by special order

ShotTag after bead blasting and painting

Acid Rinse then Bead Blast with One Tag for the Entire Process

ShotTag is designed to withstand bead and steel shot blasting applications. It carries identifying text and barcodes through acid baths, blasting and even painting.

Like all of InfoSight's Fabricator Tags, you attach it once and your work can be tracked through the entire process.

- ⊕ One tag for the entire process.
- ⊕ Added efficiently and safety.
- ⊕ Tags make for error-free installations at customer sites.
- ⊕ Processes vary. Call for samples and test ShotTag in your process.
