- Available with either a 24 VOC or 110 VAC contact triggering signal.

Six Pack Disposable Markers

"If you can make it – we can mark it."

Send us your part and print for a no obligation evaluation.

Reliable, Easy To Use Equipment

Contact marking has never been easier. The new Dell system ships complete and ready to assemble. You can be marking parts in minutes. Two marker tip sizes are available: 1/4" and 5/8" diameter. They are ideally suited for manual and automatic applications. The valve-action tip produces a round color spot on any smooth dry work piece. Dell inks are approved by all major automotive manufacturers.

The new system is used for marking critical inspection areas of manufactured or machined parts and assemblies. They are easily maintained and the replaceable markers are quick loading and long lasting. Plus, there is no handling of fluids and no tools required. Each compression feeds just the right amount of ink to the spring loaded tip. Standard Dell Marking Ink colors are: yellow, red, green, blue, and white. Dell provides complete marking system design and build services and formulates workplace safe, low VOC pigmented and non-pigmented inks.
